

The `eso-pic` package*

Rolf Niepraschk
Rolf.Niepraschk@gmx.de

1 Introduction

This package makes it easy to add some picture commands to every page at absolute positions.

2 Usage

See also the example L^AT_EX documents (`eso-*.tex`).

2.1 Basic commands for adding L^AT_EX stuff to the page background

`\AddToShipoutPictureBG` All the picture commands which are parameters of an `\AddToShipoutPictureBG` command will be added to the internal macro `\ESO@HookIBG`. This macro is part of a zero-length `picture` environment with basepoint at the lower left corner of the page (default) or at the upper left corner (package option “texcoord”). The `picture` environment will be shipped out at every new page.

`\AddToShipoutPictureBG*` `\AddToShipoutPictureBG*` works like `\AddToShipoutPictureBG` but only for the current page. It used the internal macro `\ESO@HookIIBG` which contents will be removed automatically.

For compatibility the macros `\AddToShipoutPicture` and `\AddToShipoutPicture*` are aliases for `\AddToShipoutPictureBG` and `\AddToShipoutPictureBG*`.

`\AddToShipoutPictureFG` Works like `\AddToShipoutPictureBG` but the picture commands are on the top of the normal document content.

`\ClearShipoutPictureBG` A call of `\ClearShipoutPictureBG` clears the contents of `\ESO@HookIBG`.

For compatibility the macro `\ClearShipoutPicture` is an alias for `\ClearShipoutPictureBG`.

`\ClearShipoutPictureFG` A call of `\ClearShipoutPictureFG` clears the contents of `\ESO@HookIFG`.

`\LenToUnit` [Allows a length as parameter to a picture command.] Note that this macro exist only for compatibility to older versions of this package. A recent L^AT_EX version allows dimensions in picture commands.

`\gridSetup` `\gridSetup[<gridunitname>]{<gridunit>} {<labelfactor>} {<griddelta>} {<gridDelta>} {<gap>}`. For details see the implementation section.

*This document corresponds to `eso-pic` v3.0c, dated 2023/05/03.

2.2 Package options

	Option	Value	Comments
\AtTextUpperLeft	<code>pscoord</code>	empty or <i>true, false</i>	The zero point of the coordinate system is the lower left corner of the page (the default).
\AtTextLowerLeft			
\AtTextCenter		empty or <i>true, false</i>	The zero point of the coordinate system is the upper left corner of the page.
\AtStockUpperLeft	<code>texcoord</code>	empty or <i>true, false</i>	A grid is drawing; default: false.
\AtStockLowerLeft	<code>grid</code>	empty or <i>true, false</i>	Put the grid in the background; default: false.
\AtStockCenter	<code>gridBG</code>	empty or <i>true, false</i>	
	<code>gridunit</code>	<i>mm, in, bp, pt</i>	Distance between gridlines are multiples of <code>gridunit</code> . default: mm.
	<code>gridcolor</code>	a valid color name	Color of the main gridlines; default: black
	<code>subgridcolor</code>	a valid color name	Color of the subgridlines; default: black.
	<code>subgridstyle</code>	<i>solid or dotted</i>	'dotted' is very slow! default: solid.
	<code>colorgrid</code>	empty or <i>true, false</i>	Shortcut for 'grid=true', 'gridcolor=red' and 'subgridcolor=green'; default: false.
	<code>dvips</code>	empty or <i>true, false</i>	Is also true if the package option <code>dvips</code> is used by <code>color</code> or <code>graphics</code> . If true package <code>eepic</code> is loaded for better performance of dotted lines.
